Biography:

BenJetta is a graduate of North Carolina State University with a degree in Civil Engineering and is a licensed professional engineer. With over 6 years of transportation engineering experience she has been employed with the Department of Transportation since February 2003 in the Congestion Management & Signing Unit.

Currently, BenJetta is a Plan Review Project Design Engineer. In this capacity, she provides comprehensive traffic safety and operational reviews for Municipal and TIP projects. For the past three years, she has also worked under the tutelage of Jim “Mr. Roundabout” Dunlop, completing over a dozen roundabout reviews throughout the state. Careful not to be overly influenced by her manager’s ‘devilish’ ways, this self-proclaimed protégé holds fast to her love of everything red and white. She is currently part of the review team for the City of Raleigh’s Hillsborough Street Corridor project, which plans to construct 5 roundabouts adjacent to the NC State Campus.
